Subject: Re: FWD: K-Series long-term study

Sensitivity: Confidential

Martin,

I am working on getting the clinical dates set for the long term Series K study (AA03468) but I think that we can decide on the date of the IRB meeting.

Final documents, Protocol, Attachments and ICF, would be needed from Philip Morris on Wednesday, 14 May 2003, for the 20 May 2003 IRB meeting. This would give us a little over 7 weeks to prepare and finalize those documents and 6 weeks for MDS to set up the study.

Will this work for you?

Thanks
Kim

Dear All,

please could you forward the date for the IRB of the K-Series long-term study?

Regards,

Martin
